LEGAL DISCLAIMER

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

LEGAL DISCLAIMER

Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability:

Diramcoin shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your whole investment.

Investment risks:

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

WHO WE ARE?

Being a clean, renewable form of energy that is available every day of the year and can produce some energy even in cloud days, the aim diramcoin is to contribute to the generation of green types of energy through the investment of private people and factories who believe in diramcoin and want to finance their projects whit it and increase the utilization of solar energy as much as all kind of green energies. This contribute to the generation of new jobs directly, by hiring electricians and solar system installers, and indirectly, by acquiring the necessary components for the installation of solar generators for always new and more numerous projects.

Diramcoin knows the importance of solar energy mainly being pollution free, it does not cause the emission of greenhouse gases after installation. It will help the world to reduce dependence on oil and fossil fuels. Being a clean, renewable form of energy that is available every day of the year, even cloudy days produce some energy.

The goal of Diramcoin is to enhance the solar and its service industry for transactions on day to day business. These coins are created through the BEP platform and shared between participating parties on both the buy and sell side of marketing deals through IEO. The process utilizes multi layer protocol for tracking and the full platform for both encryption and interrogation of the contracts.

OUR MISSION

Our mission is to provide the highest quality renewable energy products and services to customers who are interested in reducing energy costs and carbon footprint. Our values include: Ethics and integrity, responsibility, honesty and openness to all aspects of our business. Provide the most compelling value in the solar industry. Value, as defined by our customers, means designing and installing the highest quality solar energy systems, on time, safely and with high customer satisfaction. Diramcoin is conceptualized as an ecosystem with smart technologies aimed at solving the current problems associated with solar energy. Which can solve underlying challenges. Enabling retailers to accept digital assets for goods and services. Making blockchain technology and cryptocurrency accessible to the masses, even if most don't know how it works. Technological advancements in the means of production are the driving force behind the changes in the prevailing system of socioeconomic relations. Feudalism was transformed into capitalism as a result of such advancements. While man obtained physical freedom, the financial freedom remained under the control of the centralized authority. A deep level of collaboration is required to attain the next level of productivity provided by new technological advancements.

VISION OF DIRAMCOIN

By providing unparalleled value, we will greatly accelerate the adoption of solar energy systems. This will give our customers, our communities and our nation clean, abundant, low-cost energy that will allow us to provide financial security for all our holders. We envision building an ecosystem that is a decentralized financial system that can only be created by appropriately managing people, value, ownership, and reputation.

Our Vision is to :

- To make blockchain technology and cryptocurrency accessible by the solar energy, even if the majority don't know how it works.
- To create an ecosystem where different solutions can emerge from a social perspective, including collaborative applications.
- We are providing the atmosphere where the technology is used to allocate authentic ownership of assets in a solar.
- To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems.

"What I find most inspiring about this business is that we put the power back in people's hands...." -Aaron Eriksson

BENEFITS OF HOLDING

It is advantageous in cryptocurrency as it generates rewards by holding the coin on any exchange and generating passive income. When an investor holds a coin and staking the pool, it is the easiest method to do, in a decentralized world. There is very sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining. Diramcoins is here for you.

Passive Income:

Stake holders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

More Cost Effective:

Proof of stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and ecofriendly. So, the stakes can earn more passive income by using Smart Liquidity Global Business coin.

BENEFITS OF HOLDING

Scalability:

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in a variability of ways. Proof of stake protocols, as shown by diramcoin higher transaction outputs and lower fees, make for greater scalability.

Echo Friendlier:

As Proof of stake blockchains are less energy consumers, they are more environment friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

Highly Secured with the help of Smart Contract:

The biggest issue in the modern world is security and privacy, and We provides a swift and stable portal that is backed by the diramcoin contract, making him superior to others. diramcoin contract is offering a highly secure and fast platform to the users for staking crypto.

SMART TECHNOLOGIES

Diramcoin provides unique technology to its users. It's also not just for the super-rich who have it in abundance and are constantly looking for something extraordinary to spend their money on (See our '3 Most Expensive Gadgets' article to see how crazy the super-rich can be. Smart technology is readily available to a variety of people and is more common than ever. Programmable temperature settings, one-button central lighting control, remote controls that open and close the room's blinds... many use smart technology in our homes, but the big question is, do we really need it or is it all a little overrated?

Declining fuel sources combined with rising energy costs have made energy conservation a top priority for some. Smart technology helps, by automating home energy usage. Many of us forget to turn off the lights or turn off the thermostat before leaving the house, resulting in a huge waste of energy and money, both of which we cannot afford. In homes using smart technology, light usage is automatically regulated, heating and cooling equipment is monitored and appliances are switched off if not in use.

WHY CHOOSE US?

Open for global participants:

Diramcoin facilitates the transaction and brings them closer to a wider audience. An added benefit of diramcoin use is that it's completely decentralized, so p2p trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. Diramcoin has no border so these can be used no matter where you are located globally. This also has a huge effect on international payment fees.

The efficiency of payment transactions:

Standard transfers and foreign purchases typically involve fees and exchange costs. Since diramcoin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.

WHY CHOOSE US?

Fast and secure:

Diramcoin is different because of its potential features of security, privacy, transparency, blockchain technology, Farming, lending, P2P trading, and NFTs marketplace. We have created a platform to connect people through Solar.

Strong security:

Built and maintained to the highest security practices to ensure our users and their funds are always protected. We provides private and secure proprietary technology applications (app), decentralized exchange with its encrypted communication platform.

Free from corporate and government interference:

Our Coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the Inconvenience of typical authorization and waiting period requirements.

BENEFITS OF USING DIRAMCOIN

Diramcoin will structure high volume of business portfolio and also help businesses across the planet with similar advantage. This will help consumers, business houses, traders, e-commerce platforms to seamlessly transform the existing models to crypto based environment, thus increasing profits and ease of business.

Global Acceptancy:

Cryptocurrencies are a borderless means of exchange allowing instant and cost-effective transactions worldwide. There is no waiting, no international fees and no limitations as to who can or cannot send funds to whom or when and where those funds can be accessed.

Blockchain Technology:

Blockchain is a distributed ledger technology (DLT) for record-keeping of cryptocurrency transactions. It is also a database to achieve independent verification of the chain of ownership of any and every amount.

BENEFITS OF USING DIRAMCOIN

Low Transaction Fees:

Most of the people feel this pain. But the use of diramcoin takes this pain away. It means diramcoin is the best cryptocurrency to invest in. Its users do not have to worry about expensive transaction fee and chargeback.

Instant Operations:

Well, it is the best solution for ultra-fast contactless international transactions. As a result, all transactions get completed within 15 seconds time only. This is why Diramcoin is fast becoming the best cryptocurrency to invest in.

Easy Accessibility:

Paying with cryptocurrency is simple and convenient. Digital payments using smartphones instead of a credit card is awfully convenient. This is where the global business coin proves to be the best cryptocurrency to invest in. Meaning, you can make payments for anything using diramcoin.

DIRAMCOIN SWAP

A decentralized trading platform on diramcoin will be added, satisfying the needs of fully decentralized payments. Smart global business connects Tron making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world the dominant cryptocurrency, Smart Swap guarantees outstanding speed token processing and extremely low transaction fees so that the community can easily connect. Diramcoin is an easy, fast, and secure exchange creating a completely new ecosystem, built to facilitate a crypto derivative market where traders have access to a variety of trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way. Diramcoin is going to launch its own decentralized exchange. With our swap, you can exchange crypto in your Private Key Wallet or your Trading Account. Exchanging from your Private Key Wallet provides you with the benefits of a non-custodial, on chain trade settlement. Swapping from your Trading Account provides faster settlement and no network fees. There are many great reasons our Wallet users love using swap:

- Quickly exchange into an asset you believe will grow.
- Move out of a volatile asset into one of our cryptocurrencies.
- Hedge against real-world events.

ECOSYSTEM

Flexible Input Plans:

Strictly Decentralized, token that powers the network, enabling holders to participate in governance decisions and access SLT services.

High Limits, Low Fees:

A fully-embedded Governance model allows diramcoin holders to regulate the token burn, fee rates, staking rewards, and much more. The token will be used in voting for future project investments.

Easy Payment:

Automatic Liquidity staking is one of the most valuable functions of the diramcoin protocol. As transactions happen on both the buy or sell-side we can take a percentage of the tokens and stake them as liquidity for the exchange of diramcoin. This will mitigate many issues other tokens experience such as price fluctuations, whales selling, and causing excessive price drops, and provide for confidence in the long-term viability of the project.

CHALLENGES WE OVERCOME

Centralization and waste of Electricity:

Many cryptocurrencies are centralized, and there is a central authority involved, with trading and transactions. Higher power of electricity and equipment are required for the blockchain to work.

No Open Standards:

There is no extensively recognized standard for decentralized cryptocurrencies. The users have no idea that what to expect and the customer interface is always a reconsideration.

Expensive and Time-Consuming:

It is always an expensive and time-consuming experience, to build and manage a network for blockchain technology. The challenge of operating a virtual economy is a mess, and security issues add to the complexity.

KEY SPECIFICATIONS OF DIRAMCOIN

The list of its specifications includes but is not limited to the following only:

- This decentralized cryptocurrency leverages the potential of P2P (Peer-to-Peer) technology to ensure the hassle-free transfer of tokens from person to person using the internet.
- Eliminates central repositories like banks or other authorities from the process to ensure speedy and low-cost transactions.
- Diramcoin can be used in every country.
- Your account cannot be frozen.
- No arbitrary limits.

A parallel currency is required to make life easier for users. This is exactly what the cryptocurrency concept is for. Cryptocurrency is required to be adopted in all parts of the world for this. The achievement of this feat could be possible with only comprehensive cryptocurrency solutions.

TOKENOMICS

The world population needs energy, today more than ever:

1. Tecno Casologie Green:

Some scientific teams are working on batteries they use. Sustainable organic molecules to store energy. The goal is to replace lithium -ion batteries that currently represent the only technology for our devices electronic (including new generation electric cars), biomass with solid and sewage waste - industrial waste.

- Wind turbines
- solar panels
- Solar panels that produce energy at night
- Best batteries

2. Air Pollution

- Ecological buildings: coating with biodynamic cement.
- Titanium dioxide covered tiles (tio₂).

3. Technology to bring water and toilets where they are missing.

TOKENOMICS

TOTAL SUPPLY 100 000 000 000

LIQUIDITY 60%

FUTURE EXCHANGE 20%

MARKETING 10%

Y DONATIONS 10%

TOKEN DETAILS

Token Name	-----	Diramcoin
Symbol	-----	DIR
Network	-----	etherscan
Decimal	-----	18
Total Supply	-----	100,000,000,000
Max Supply	-----	100,000,000,000
Circulating Supply	-----	80,000,000,000

ROAD MAP

PHASE 1

- Other Decentralized
- Exchange
- Advertisement on all Social Media Platforms
- Donation for the search for environmental well-being

PHASE 2

- Events Campaigns
- Whitepaper Release
- Smart Contract Audits
- Updated Web 3.0 Websites

Diramcoin : <https://diramcoin.com/>

ROAD MAP

PHASE 4

- Real-World Marketing outside of Cryptosphere
- iOS, Android and Web
- Wallets to help INVESTORS and holders track their holdings
- Multi chain master-node backing treasury.
- Capital will be invested into major research projects for green settings.

PHASE 3

- Major CEX Listings
- App Development for IOS
- Formation of a Corporation
- Corporate Partnership(s)
- Purchase Land for Corporate Ownership
